

- Made with no-break copolymers
- Exceeds ASTM crush standards
- Superior quality seamless extrusion technology
- Works with 3" and 4" corrugated, and 4" PVC pipe
- Meets stiffness and flattening requirements of CPPA specification 100-97 for storm and sewer applications

In virtually any non-pressure storm drainage situation, FLEX-Drain® offers a more efficient solution than traditional 4" plastic landscaping pipe. It bends easily and flexes around any obstacle or structure. It requires less cutting and measuring. It holds its shape during installation. And with a simple snap, its integrated soil-tight fittings lock securely and stay connected.

## A full range of fittings.

FLEX-Drain® fittings help take you places no other drain pipe can, with a comprehensive range of options that help you get the job done – fast.

## Just what you need. Just where you need it.

Because FLEX-Drain® is so versatile, it's perfect for running behind walls of any shape, step down or curved installation. Test results prove it meets the most rigorous demands of contractors. And it's guaranteed not to split, crack or break when used in accordance with local building codes.

Easy to Set.

Easy to Stretch.

Easy to Bend.

While FLEX-Drain® is made available at retail in pieces that stretch from 3 to 12 feet and 6 to 25 feet, our 50-foot contractor pack is designed specifically to work even harder for contractors.
